- ADDENDUM -

*Imagining Ways to Distrupt
Immigration Raids in Action*

— LA MIGRA —

Together we watch the news as State Authorities unjustly detain and remove our friends, family members, and neighbors from our communities. We try to fight back politically, legally, by boycott and by protest ... and yet still people are taken.

This zine imagines what we might do if these authorities came into our neighborhoods. But note it is not a playbook. Each person reading this zine is responsible for researching laws in their area and deciding what risks should remain imaginary and which inspire action.

How likely are you to do each (theoretical) task?

☐

La Raza, Unida, Jamás Será Vencida

Human Chain

I can research techniques and be part of a human chain to protect my neighbors from those who might take them.

Doxxing

I can take pictures of perps, look up their names, and release that information to the public. I can publicly shame those involved.

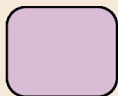

Classic Pranks

I can use classic pranks to cause disruption. Such as smoke or stink poppers, silly string, marbles, and etc.

Rapid Response Team

I can be part of a crisis, defense, or rapid response team that act as Cop Watchers, Legal Observers, Protection, and Crisis Care.

Flatten Tires

I can risk the consequences and flatten tires of those involved in taking our neighbors.

The People, United, Will Never Be Defeated

Flash Mob

I can create, or join, a flash mob that would be used for causing public distractions during high risk situations.

Warning System

I can take pictures, record data, and report sightings of injustice to my community using some form of alert system.

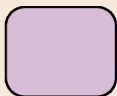

De-Arrest Techniques

I can study and learn basic de-arrest techniques in order to help folks who have been unjustly detained.

Drones

I can use drones to make legal observations, distract, or disrupt during high risk incidents.

Noise/Air Horn

I can use an air horn, or otherwise make a loud ruckus, to cause a distraction and act as an alert in order to aid my neighbors.

La Raza, Unida, Jamás Será Vencida

Block Roads

I can be part of efforts to block roads in order to prevent folks from entering our communities to do harm.

Paint Windshields

I can spill on, or otherwise, obstruct the windshields of non-moving vehicles that are being used to take away my neighbors.

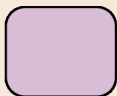

Fire Extinguisher

I can use a fire extinguisher to cause a distraction and obstruct the view of people trying to cause harm.

Air Tags

I can purchase and drop air tags on vehicles that are being used to follow my neighbors.

Vests

I can wear an official looking vest and use it to confuse and delay those people who are acting in unjust ways.

The People, United, Will Never Be Defeated

There are many more brilliant ideas in our collective imagination. Here I have provided space for you to add some of your favorites to the list. We can keep us safe.

Your Ideas

— LA MIGRA —

Tips and Reminders

- As we imagine ways we might be able to step in and help our neighbors we must note that our actions would differ based on where the targeted person is. Our actions should not put them in greater danger.
- We want our impact to match our intent and that is to be of service, not to get social media approval.
- Consent should be acquired before sharing any media or information about specific targeted people.
- Historically a Leaf Blower has been effectively used as a way to blow back Tear Gas away from protestors.
- There is a lot of really good protest safety information online these days, it is worth reviewing now when you feel safe(ish).

The information in this zine is provided for imaginary and educational purposes only.

This zine is open-source.
You may print and distribute it at will so long as it is for a
reason that supports the immigrant community.
